

IBM Envizi ESG Suite

1. What is Envizi?

A comprehensive data and analytics software suite to collect, manage and derive insights from ESG data.

Our clients use Envizi to:

 **Build a data foundation**
Automate capture and consolidation of more than 500 data types across siloed data sources

 **Streamline reporting**
Calculate GHG emissions and support internal and external ESG reporting

 **Accelerate decarbonization**
Unlock insights for the fastest and most cost-effective way pathway to low carbon goals

Delivered as an easy to adopt SaaS solution.

3. Solution framework

2. Key challenges Envizi can help with

 **Complexity:** Sustainability initiatives cut across business operations. It's difficult to know where to start and who should be involved

 **Growing number of stakeholders to manage:**
Investors, consumers, employees, and governments

 **Mounting pressure** to progress toward more sustainable and socially responsible business operations

 Managing and operationalizing sustainability data across **siloed sources** and **evolving reporting** datasets

4. Key differentiators

15 years	175	48k
Time in market	Countries	Emission factors
216k	810k	83k
Locations	Utility accounts	Utility meters

Breadth spans emissions management, ESG reporting and decarbonization

Scalability modular platform to suit you, regardless of where you are in the sustainability journey

Flexibility customizable reporting with embedded Power BI

"IBM should be included on shortlists by enterprise firms seeking a comprehensive and reliable carbon management platform"
-Verdantix, independent analyst firm

Operationalizing sustainability: Turning sustainability ambition into action with IBM

In order to reduce energy emissions and achieve your decarbonization goals, you need to have the right technology to embed sustainability as part of your daily decision making and drive transformation.

Through integrating your ESG system of record with your operation systems, data insights will provide two-way visibility to drive informed decisions to keep your sustainability performance on track and increase business efficiency.

We help you to optimize your operations and cost, while reducing waste and emissions.

Sustainability Strategy and Roadmap

Garage for Sustainability (co-creation)
Sustainability strategic advisory services

ESG Data, Reporting and Risk Management

Envizi
Environmental Intelligence Suite

Intelligent assets, facilities and infrastructure
